

Allergen Retest Certificate

Food Safety · 2025-03 · Issue 2

1. Requirement

An allergen retest is required following the ingredient change. The product now uses Heritage Stoneground flour, which is milled on a line that also handles other grains.

The product may not be labelled or sold beyond its present outlets until the retest has been passed.

2. First test

Field	Entry
Product	Classic Sourdough (SD-12)
Sampled	2025-03-04
Laboratory	External, accredited
Result	Inconclusive

The first test did not give a clear result. One of three samples showed a trace reading at the limit of detection.

3. Retest

A full retest on six samples is booked with the external laboratory for 2026-04-14.

This certificate forms part of the file for withdrawal W-2025-014 and is reissued when the retest result is received.
