

Production Tolerance Tables

Quality · 2025-05 · Revision 9

1. Ingredient weighing

Tolerances for weighing ingredients are stated by the size of the weighing and by tolerance grade. Values are in grams. The grade to use is stated on the recipe card.

Nominal weight	Fine	Medium	Coarse
Up to 100 g	1	2	5
Over 100 g to 1 kg	5	10	20
Over 1 kg to 10 kg	20	50	100
Over 10 kg	50	100	250

Where a recipe card states a tolerance of its own, the recipe card governs.

2. Baked weights and sizes

Tolerances for finished products are stated by feature and by tolerance class. Weights are in grams and sizes are in millimetres. Each value is the amount the feature may fall below or rise above its nominal figure.

Feature	Class A	Class B	Class C
Baguette, baked weight	5	10	15
Baguette, length	5	10	20
Farmhouse white, baked weight	10	20	30
Farmhouse white, height	3	6	10
Granary bloomer, baked weight	10	20	30
Granary bloomer, length	5	10	15
French stick, baked weight	5	10	15
French stick, length	10	15	25
Butter croissant, baked weight	2	4	6
Butter croissant, width	3	5	8
SD-13 baked weight	15	25	35
SD-13 loaf, height	4	8	12
SD-12 loaf, score depth	2	4	6
SD-12 baked weight	10	20	30
SD-12 loaf, height	4	8	12
Fruit scone, baked weight	3	5	8
Fruit scone, height	2	4	6
Eccles cake, baked weight	3	5	8
Lemon drizzle, baked weight	10	15	25
Dinner roll, baked weight	2	4	6
Dinner roll, width	2	4	6
Rye loaf, baked weight	10	20	30

Feature	Class A	Class B	Class C
Rye loaf, height	3	6	10
Seeded batch loaf, baked weight	10	20	30
Seeded batch loaf, height	3	6	10
Cheese straw, baked weight	1	2	3
Cheese straw, length	5	8	12
Mince pie, baked weight	2	4	6
Almond croissant, baked weight	3	5	8
Hot cross bun, baked weight	2	4	6

Weight is measured when the product has cooled for one hour. A weight taken from a warm product is not equivalent and shall not be recorded against this table.

Class is assigned per product on the recipe card. Where a product appears in this table and is not assigned a class on the recipe card, Class B applies.

3. Oven temperature bands

Temperature bands state how far an oven may drift from its set temperature during a bake. Values are in degrees Celsius either side of the set temperature.

Provision	Revision 8	Revision 9
Band basis	Single band, all ovens	Per oven type
Deck oven	15	5
Rack oven	15	8
Convection oven	15	10
Measurement point	Not stated	Centre of the deck or rack

An oven found outside its band is taken out of use until it has been checked. The band applies to the oven and not to any one product baked in it.
