

Bill of Materials — BV Series — 2025 Edition

Engineering · 2025-01 · Edition 5

1. Introduction and revision history

This bill of materials lists the line items making up each assembly in the BV series, with the part number, quantity and approved source against each item. It is issued by Engineering and reissued at each edition.

This edition supersedes edition 4. Line items altered at this edition are marked in the revision history below.

Edition	Issued	Change
Edition 5	2025-01	Seal line item, BV-12
Edition 4	2024-01	Fastener kit, BV-13
Edition 3	2023-01	General reissue

Sources listed against a line item are those approved for the item at this edition. Approval is held per site and is recorded in the supplier register maintained by Procurement; this document does not record site approval.

Where more than one source is approved for a line item, any approved source may be drawn. Where a single source is listed, no alternative is approved.

2. BV-12 assembly

Line items for the BV-12 assembly are listed below. The list is complete for the assembly as built to the configuration current at this edition. Quantities are per assembly.

Characteristic	Value
Maximum operating temperature	180 degC
Minimum operating temperature	-20 degC
Nominal bore	25 mm
Connection	Flanged
Body material	Cast body
Seal material	FKM-70
Mass	3.4 kg
Test pressure	Per test certificate

The seal line item against this assembly is specified as FKM-70, supplied by Alpha Dichtungen GmbH. Line items are listed in item order.

Item	Part number	Description	Qty	Source
001	P-69294	Clip	8	Beta Valve Co.
002	P-76563	Insert	4	Alpha Dichtungen GmbH
003	P-77096	Dowel	3	Alpha Dichtungen GmbH
004	P-68535	Washer set	3	Alpha Dichtungen GmbH

3. BV-13 assembly

Line items for the BV-13 assembly are listed below. The list is complete for the assembly as built to the configuration current at this edition. Quantities are per assembly.

Characteristic	Value
Maximum operating temperature	150 degC
Minimum operating temperature	-20 degC
Nominal bore	25 mm
Connection	Flanged
Body material	Cast body
Seal material	FKM-70
Mass	3.4 kg
Test pressure	Per test certificate

The seal line item against this assembly is specified as FKM-70, supplied by Alpha Dichtungen GmbH. Line items are listed in item order.

5. Approved supplier index

Sources approved against line items in this edition are listed below, with the categories each is approved to supply.

Source	Category
Alpha Dichtungen GmbH	Elastomer seals and gaskets
Beta Valve Co.	Valve bodies and machined components
Gamma Sealing Systems	Sealing systems and kits

A source listed here is approved for the categories shown. Approval for a category does not extend to items outside that category.

Changes to the approved source against a line item are made at edition only. Where a change is required between editions, it is handled by concession against the specific build and is not reflected in this document.

Source	Line items, BV-12	Line items, BV-13	Common
Alpha Dichtungen GmbH	Seals and gaskets	Seals and gaskets	Seals
Beta Valve Co.	Bodies and machined	Bodies and machined	Machined
Gamma Sealing Systems	—	Kits	—

Gamma Sealing Systems is approved against BV-13 line items only. It is not an approved source for any BV-12 line item or for any common component.

Enquiries regarding an approved source should be directed to Procurement.
