

Delegation of Authority Matrix

Corporate Governance · 2025-03 · Effective 2025-03

1. Effective date and scope

This instrument sets out the levels of authority conferred on roles within the group, and the limits applying to each level. It takes effect on 2025-03 and governs approvals made on and after that date.

Field	Entry
Instrument	DOA-2025-03
Effective	2025-03
Issued by	Corporate Governance
Scope	All functions, all product families

The instrument is issued following the functional reorganisation, which altered the roles on which authority is conferred. Roles named here reflect the structure in place from the effective date.

Authority is conferred on a role, not on an individual. The holder of a role at any date is recorded in the appointments record maintained by Human Resources.

2. Authority levels 1 and 2

Level 1 is conferred on functional management and covers decisions taken wholly within a function, where no characteristic of a product is altered.

Level	Conferred on	Covers
Level 1	Functional management	Decisions within a function
Level 2	Senior functional management	Decisions affecting qualified characteristics

Level 2 is conferred on senior functional management and covers decisions affecting a qualified characteristic where no safety-critical interface is affected.

The reorganisation did not alter the scope of Level 1 or Level 2. Roles carrying these levels were renamed in several functions without change to the authority conferred.

3. Authority level 3

Level 3 is the highest level conferred by this instrument. It is held by the role set out below.

Level	Role holding the authority
Level 3	Head of Product Integrity

Level 3 covers decisions affecting a safety-critical interface, and any decision expressly reserved to Level 3 by the procedure governing it.

The Head of Product Integrity role was established at the reorganisation and carries the authority previously conferred elsewhere in the structure. Level 3 authority may not be delegated.

The identity of the holder of the Head of Product Integrity role at any date is recorded in the appointments record. This instrument names the role and does not name the holder.
