

# Line Stoppage Record

Manufacturing Operations · 2025-08 · Issue 1

## 1. Stoppage record

Stoppage recorded on assembly line 2, Plant X (Bamberg).

| Field    | Entry              |
|----------|--------------------|
| Record   | LS-BAM-2025-052    |
| Site     | Plant X (Bamberg)  |
| Line     | Assembly line 2    |
| Stopped  | 2025-08-12, 09:40  |
| Duration | 4 hours 20 minutes |

The line was stopped by the cell leader following a check on seal material drawn to the line from released stock.

Hardness checks performed at the workstation returned values below the lower specification limit across the items checked. Seal hardness below specification was recorded and the material withdrawn from the line.

2. Resumption

Material from an alternative released lot was drawn and checked before the line was restarted.

| Field                   | Entry                        |
|-------------------------|------------------------------|
| Alternative lot checked | Conforming                   |
| Line restarted          | 2025-08-12, 14:00            |
| Assemblies quarantined  | 26                           |
| Withdrawn material      | Returned to quarantine store |

Assemblies built in the period before the stoppage were quarantined and assessed. The assessment record is held with the quarantine note.
