

Nonconformity Report — Incoming Inspection

Incoming Inspection · 2025-02 · Issue 1

1. Nonconformity

Nonconformity raised at incoming inspection, Plant X (Bamberg), against elastomer seal material received under the delivery reference below.

Field	Entry
Report	NCR-BAM-2025-018
Site	Plant X (Bamberg)
Raised	2025-02-19
Delivery reference	DN-2025-0431
Material	Elastomer seal, housing interface

The material was sampled on receipt in accordance with the incoming inspection plan for the category.

2. Measurements

Hardness measurements were taken across the sample. Values fell below the lower specification limit in 9 of the 30 items sampled.

Characteristic	Specification	Result
Hardness	Within declared band	Below lower limit, 9 of 30
Compression set	Within declared band	Conforming
Dimensional	Within drawing tolerance	Conforming

Seal hardness below specification is recorded as the nonconforming characteristic. No other characteristic was found nonconforming.

3. Disposition

The delivery was rejected and quarantined. A notification was raised to the supplying source through Supplier Quality.

Field	Entry
Disposition	Reject delivery
Quarantined	2025-02-20
Notification raised	2025-02-20
Replacement requested	Yes

The material was not released to the line at any point.
