

Monthly Rework Return

Manufacturing Operations · 2025-09 · Issue 1

1. Rework counts by plant

Rework recorded for September 2025, by site. Counts are units entering the rework cell in the period and are taken from the rework booking record.

Site	Units reworked	In-process	Returned from field
Plant X (Bamberg)	217	82	135
Plant Y (Kassel)	95	36	59
Plant Z (Ingolstadt)	182	69	113

Counts are stated as booked. Units entering rework in the period and not closed by the period end are carried and appear again in the following period's in-process column.

2. Notes

The return is prepared by Manufacturing Operations from the rework booking record and is issued within five working days of the period end.

Figures in this return cover the period stated above only. Comparison across periods is not made in this return and is performed at the quarterly review.

Queries on a figure should be directed to the site recording it, quoting the return reference above.
