

Test Laboratory Coordination Meeting — Q1 2025

Test Laboratory · 2025-03 · Issue 1

1. Attendance

Quarterly coordination meeting of the test laboratory, held to review rig utilisation, agree allocation for the coming quarter, and record actions arising.

Attendee	Function
R. Vogel	Test Laboratory (chair)
S. Klein	Test Laboratory
T. Amsel	Engineering liaison
P. Reuter	Facilities

Apologies were received from the Engineering liaison for the second half of the meeting. Minutes were circulated for comment and are recorded as agreed.

2. Rig utilisation

Utilisation across the four rigs was reviewed for the quarter. Rigs 1 and 2 operated at capacity throughout. Rig 4 was available but under-utilised, with two open windows in February that were not taken up.

Rig	Utilisation	Notes
Rig 1	96%	At capacity
Rig 2	94%	At capacity
Rig 3	88%	See allocation below
Rig 4	41%	Two open windows in February

Allocation for the coming period was agreed, with rig 3 reallocated to the injector programme for six weeks with effect from the start of the period, following the request recorded at the previous meeting. Existing bookings on rig 3 were offered rig 4 where the fixture permits.

Two bookings could not be transferred, as the fixture is not interchangeable between rigs 3 and 4. Those bookings were returned to the requesting function to rebook once rig 3 is released.

The chair noted that rig 4 utilisation remains the standing item and that the fixture interchangeability question should be resolved before the next allocation round.

3. Actions

Actions arising are recorded below. Actions are carried forward until closed at a subsequent meeting.

Ref	Action	Owner
Q1-01	Confirm rig 3 release date to requesting functions	Test Laboratory
Q1-02	Assess fixture interchangeability, rigs 3 and 4	Engineering liaison
Q1-03	Review rig 4 utilisation at next meeting	Test Laboratory
Q1-04	Rebook transferred bookings on release	Requesting functions

No other business was raised. The next meeting is set for the usual interval.
